

DAROU PAKHSH

Company Profile

Darou Pakhsh, the leading pharmaceutical company in Iran was founded in 1956. Following the expansion policy, a contract was signed between DP and Allen & Hanburys to construct a modern pharmaceutical factory in west part of Tehran . The Knowledge of transferring technology to produce sterile injectables, sterile infusions (steriflex), sterile eye drops, solid dosage forms, ointments, creams, topical emulsions, oral suspensions and syrups in the new plant originated with A&H and other British pharmaceutical companies.

At the beginning, sterile and non-sterile pharmaceutical brands of Messrs. A&H, Glaxo, ICI and BDH along with generic drugs of Allen & Hanburys were produced by DP and later Messrs. Schering USA, MSD USA, Astra Sweden, Collette Norway and Chibbret France also joined Darou Pakhsh to manufacture their specialities in Iran.

During the last 5 decades, Darou Pakhsh has been upgrading its production lines to fulfill the cGMP requirements and has tried to implement QA criteria in the factory. Also new sterile department which was executed by technical cooperation of Messrs. Organon has been designed and constructed to produce HCG and HMG injectables.

Experienced pharmacists and chemists are now closely working hard to make new formulations and other research affairs. Darou Pakhsh R&D department has been inspired with the same idea using the state-of-the-art equipments for formulation and development of new products.

We are also very much grateful to introduce ourselves as one of the biggest export companies that export its products to many countries such as Austria, United Kingdom, Russia, Belarus, Ukraine, Azerbaijan, Uzbekistan, Tajikistan, Iraq, Syria, Jordan, Lebanon, Libya, Yemen, Malaysia, Afghanistan, Pakistan, Mozambique, Uganda, Mali.

We are privileged of being the most prominent pharmaceutical factory in The Middle East and we are doing our best to take big steps to apply our knowledge for better human health. In short, Caring For Human Health.
